

**juwex**[®]
Brilliant pads – brilliant floors

Brilliant perspectives – for all hard floors!

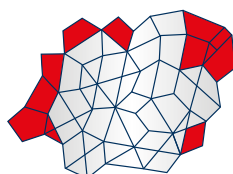

Linoleum or concrete, PVC or epoxy resin, natural stone or tiles – **Juwex**[®] pads provide perfect solutions for all types of hard floors. Special crystalline micro-particles with excellent abrasive properties provide for unique brilliance. A perfectly coordinated system for basic and maintenance cleaning is the result of using four granulations with different hardness grades.

Long service life!

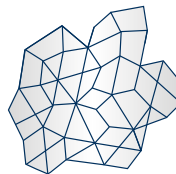

The crystalline micro-particles sharpen themselves during each cleaning operation. **Juwex**[®] pads therefore have a longer service life than conventional diamond pads.

The benefits

- **Special coating**
- **Fine, extremely hard crystalline micro-particles – four grits**
- **Effective cleaning and polishing – no chemicals**
- **Long operating life**
- **Unique textile structure: no overheating, high absorption of dust**

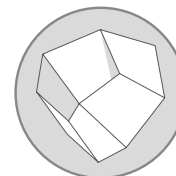

before

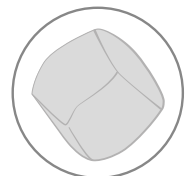

afterwards

Juwex is self-sharpening

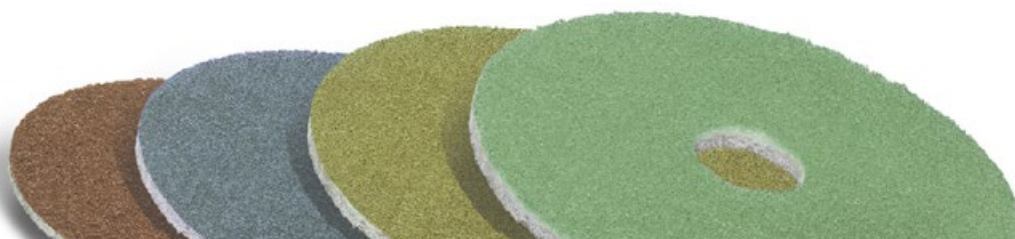

Conventional diamond pads are blunted and assume a diamond-like look faster

No
chemicals –
just
clear water!

Affordable and environmentally friendly alternative

The **Juwex**[®] system replaces normal and special cleaning. Economical, environmentally friendly – and simple. **Juwex**[®] pads require nothing but clear water. This means you do not have to select and laboriously mix any chemical cleaning products. There is no easier way.

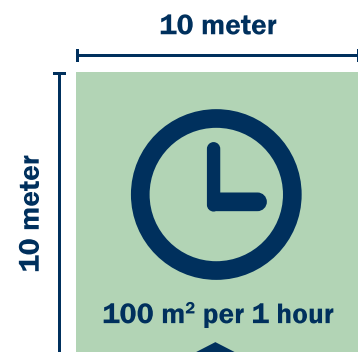

High-power cleaning

All four steps of Juwex standard cleaning can also be carried out immediately one after the other. In order to achieve optimum results, it is however recommended to use the same sequence as applied for the standard version. **As a rule of thumb: 100 m² per hour (using a cleaning machine with 85 cm cleaning width).**

For your cleaning practice!

- The higher the working pressure and the revolution speed of the machine, the faster you will achieve the desired result
- Use powerful cleaning machines
- Avoid losing time due to unnecessary or untimely charging

Juwex[®] pads

Simply brilliant – brilliantly simple

Four pads for all requirements

Juwex[®] pads have been specially developed for cleaning large areas in supermarkets, shopping centers, airports, hospitals, or schools. The system consists of four pads: red, blue, yellow and green. Each pad has a different granulation, thus fulfilling different functions.

Very fine
Grit
3000

Finishing

- For permanent brilliance and safe walking (when used regularly)
- If used daily, the floor is maintained and at the same time the polish is improved.

Fine
Grit
1500

Polishing

- Smooth polishing
- Ideal preparation for treatment using **Juwex**[®] pads “green“

Medium
Grit
1000

Cleaning

- Removes small scratches and unevenness
- Surface is finished
- For smooth, clean and semi-glossy surfaces
- Ideal preparation for treatment with **Juwex**[®] pads “yellow“ and “green“

Coarse
Grit
500

Pre-treatment

- Ideal for heavy duty surface renovation
- Removes small scratches and soiling
- For clean, mat surfaces
- Ideal preparation for treatment using **Juwex**[®] pads “blue“

Per work-step:
approx. 5 cleaning
runs using
cold water!

Step by step towards brilliant floors

Maintenance cleaning/full renovation. How to use Juwex® pads ideally!

To achieve ideal results, please observe the correct sequence of work steps. You should ideally execute each step five times in a row before continuing with the next step or grit.

Pre-treatment

A pre-treatment using Juwex red pads is recommended for heavily worn and soiled surfaces. Thanks to the coarse granulation, tenacious stains such as red wine or acid can be effectively loosened and removed.

Pre-treatment is completed after approximately five runs.

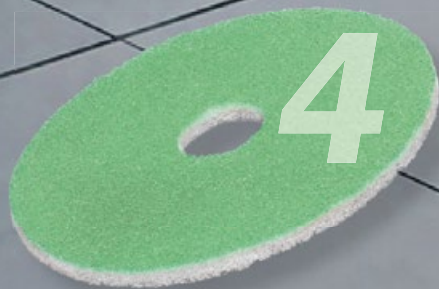

Cleaning

The blue pads are used to remove small scratches or unevenness. The floor is cleaned and prepared for polishing. At this point the floor looks blunt. **After five cleaning runs, the floor shimmers silky mat!**

Polishing

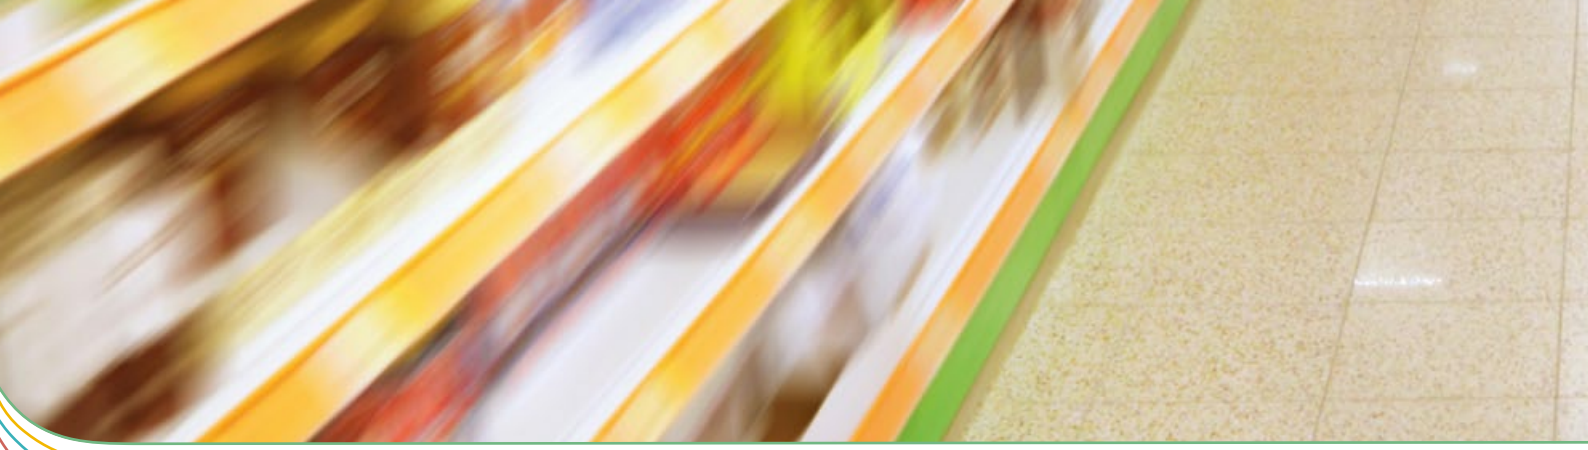

The yellow pad can be used to clean and polish the floor at the same time. **The floor will get a noble satin shine after five runs.**

Finishing! For daily use!

The green **Juwex**[®] pads provide the final touch, finishing the floor and rendering a permanently brilliant shine while allowing for a safe walk.

*Professional floor cleaning
can be that easy!*

- Grit 500 coarse
- Grit 1500 fine
- Grit 1000 medium
- Grit 3000 very fine

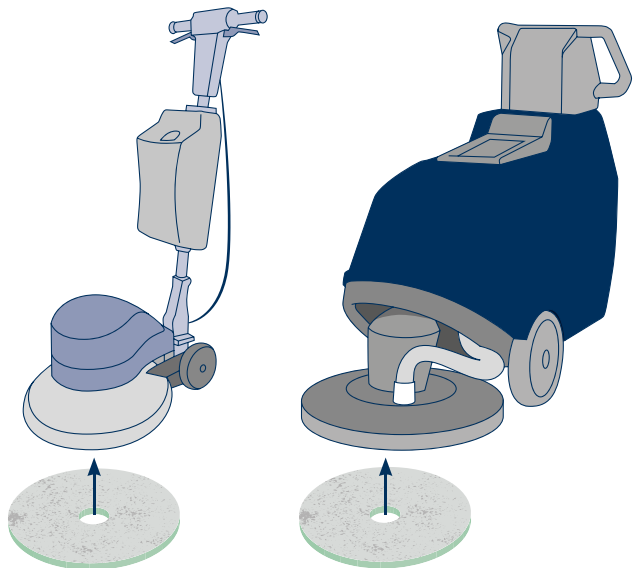

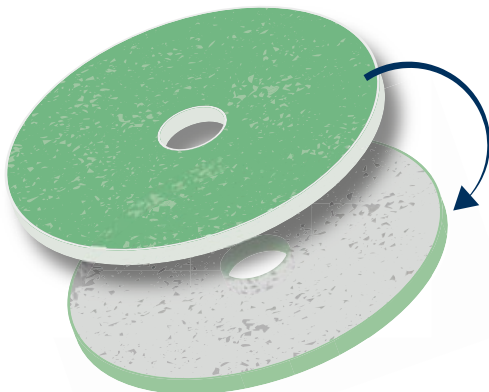

Typical applications*

Application/ Floor	Linoleum	PVC Polyolefin	Rubber Elastomer	Resin	Natural- and artificial stone	Concrete	Wood Parquet Cork	Textile
Pre-Treatment								
Cleaning	Daily floor care with Juwex® pads green							
Polishing								
Finishing								

*recommended and suggested applications. For additional information please contact your floor manufacturer. Depending on the age and the status of the floor, you may skip some colours/granulations.

Assembly

During assembly, please make sure that the coloured side points downwards.

- for all common single brush machines and automatic cleaners
- for high revolution speeds (up to 2,500 RPM)
- suitable for wet and dry cleaning

pads are ...

... economical

Juwex[®] pads can be used to replace conventional brushes and pads, thus saving conventional cleaning and care activities, periodical maintenance and coating work as well as additional wax, polish, and stripping products.

... compatible

Juwex[®] pads can be used with all conventional single brush machines (up to 2,500 RPM) and automatic cleaning machines.

... simple to use

Juwex[®] pads are easily integrated into daily cleaning routines.

... environmentally friendly

Juwex[®] pads are cleaning with clear tap water.

... top-quality

Juwex[®] pads are robust and offer extended service life.
